Connection:

BP : Eurodrone Equipments Manager EU

Descriptions

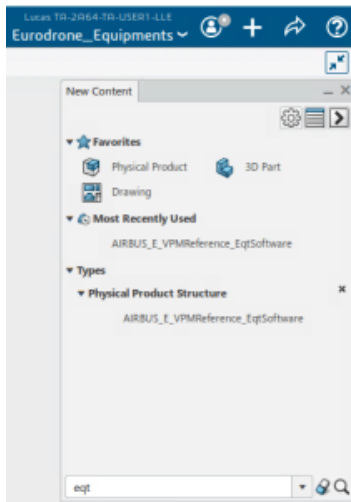

- During creation of new object **Equipment Software SPN**, the following extensions shall be added:
 - Airbus_EQ_SPN characteristics
 - AIRBUS_E_DEXT_SPNDOCS
 - AIRBUS_E_EQ_SPNAssuranceLevel
 - AIRBUS_E_DEXT_SPNREFANDISSUE
 - AIRBUS_E_EQ_FSCM
 - AIRBUS_E_Identification
- The new boolean attributes "Military" and 'For Ground Use Only' part of the AIRBUS_E_EQ_SPNCharacteristics shall be visible
- The BL to modify attributes accordingly to the maturity MS1, MS2... shall be updated to integrate this new object. The rules are the same than the ones for Equipment supplier Reference
- The BL which verifies at least attributes are fielded during the Promote to frozen state, shall be updated to take into account the new object Equipment Software SPN"
- The Occ-Occ link verification done on "Equipment Supplier Reference" in the CS Eurodrone Equipment shall be extended to the new object "Equipment Software SPN"

Creation of SPN objects shall be permitted only within the dedicated CS/organization: Eurodrone_Equipments/ADS_Eurodrone. Additionally, the BL updated to prevent the creation of any New Branch, New Revision, Duplicate & Advance Duplicate by users who do not possess at least the "Author" role within Eurodrone_Equipments.

Creation of an Equipment Software SPN

+ >> New content >> Equipment software SPN

(Add a better screenshot if you can, because in this one we don't see the good name which should be "Equipment software SPN")

To create the Equipment Software SPN you must fill out the 4 mandatory attributes

- ◆ Title
- ◆ Part Number Type
- ◆ FSCM
- ◆ Management state

- Title (OOTB attribute)
 - Naming rule for Title allows:
 - Capital letter ,
 - Digits/numbers,
 - Special characters allowed only (dot, dash and slash),
 - Up to total 24 characters length max
 - Blank spaces not allowed.

On Equipment Creation panel window

- Enter Part Number Type
- Enter FSCM (Value of FSCM limited to 5 letters)
- Management state

Equipment software SPN creation is successful
(Provided all other checks are in place.)

Else -

Equipment software SPN creation is not possible because the title is not satisfying the checks
(Lower case, Special chars, space - Not Allowed)

Title is Empty or not correct. Please use a correct pattern

- Part Number Type (AIRBUS_E_SPNCHARACTERISTICS_PNType) shall be set with value different to empty during creation

On Equipment Creation panel window

Go to **Equipment software SPN** tab

Scroll down for AIRBUS_E_SPNCHARACTERISTICS_PNType attribute

Select any value from drop down say, Series

Equipment software SPN creation is successful
(Provided all other checks are in place.)

Else -

Equipment software SPN creation is not possible because the title is not satisfying the checks

Error detected on attribute AIRBUS_E_SPNCHARACTERISTICS_PNType: Attribute AIRBUS_E SONCHARACTERISTICS_PNType is empty. Please select appropriate value from dropdown list.

- Airbus Part Number attribute (AIRBUS_E_Identification_AirbusPartNumber) shall be filled automatically with value containing in attribute:
 - Title, FSCM, Part Number Type
 - separator shall be a dash (-)

Airbus Part Number attribute (AIRBUS_E_Identification_AirbusPartNumber) shall be filled automatically
<Title>-< FSCM>-<AIRBUS_E_SPNCHARACTERISTICS_PNType>

- Attribute Management State (AIRBUS_E_SPNCHARACTERISTICS_ManagementState)

On Equipment Creation panel window

Go to **Equipment software SPN** tab

Scroll down for attribute Management State (AIRBUS_E_SPNCHARACTERISTICS_ManagementState)

Click on Drop down arrow

(Drop down values should be available as per below logic)

- If AIRBUS_E_SPNCHARACTERISTICS_PNType=Series, all value in Drop down list is selectable
- If AIRBUS_E_SPNCHARACTERISTICS_PNType=Laboratory, only value MS1 & MS2 are selectable
- If AIRBUS_E_SPNCHARACTERISTICS_PNType=Development, only value MS1, MS2 & MS3 are selectable

Drop down list should be visible for Attribute Management State (AIRBUS_E_SPNCHARACTERISTICS_ManagementState)

On Equipment Creation panel window

Go to **Equipment software SPN** tab

Scroll down for AIRBUS_E_EQ_SPNCharacteristics_military and AIRBUS_E_EQ_SPNCharacteristics_ForGroudUseOnly attributes

Select any value (True of False)

(Values should be available as per below logic)

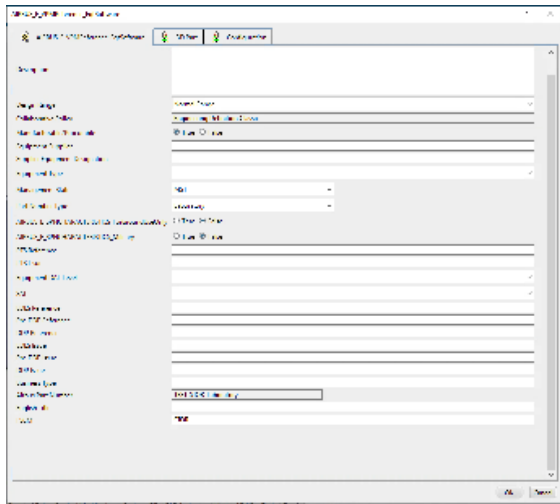

- If AIRBUS_E_SPNCHARACTERISTICS_ManagementState=MS1 or MS2 :

- Value of AIRBUS_E_EQ_SPNCharacteristics_military attribute can be editable
- Value of AIRBUS_E_EQ_SPNCharacteristics_ForGroudUseOnly attribute can be editable
- If AIRBUS_E_SPNCHARACTERISTICS_ManagementState=MS3 or MS4 :
 - Value of AIRBUS_E_EQ_SPNCharacteristics_military attribute can be editable
 - Value of AIRBUS_E_EQ_SPNCharacteristics_ForGroudUseOnly attribute can't be editable (it should be grayed)

Layout

Data model : [DATAMODEL-SWSPN02102024.pdf](#)

Properties page :

Revision of Equipment

In Collaborative Lifecycle app, maturity stage of Equipment can be changed.

In tab Equipment SPN **Management State** = **MS1** (example) **##Management state should not be empty.**

Pre-requisites:

If someone of this attributes are not filled when the management state is **MS1**

Promote the **software SPN** to **frozen** is **impossible**.

Attributes needs to be filled:

- Name= Title
- FSCM
- Supplier
- Supplier Equipment Designation
- Equipment type
- PTS Reference and issue
- DAL
- EDES Reference and issue
- Pre-DDP Reference and issue

QSD document attachment to SPN

{*}Section: "{*}Equipment Management" + icon for Know how

Function name: ~~QSD documents Attachment~~ "Equipment doc attachment"

The command dialog box looks like this: QSD documents Attachment

The matching between SPN (SW or HW) attributes and attached Documents type are as follows:

- The document type will be identify following its name according to the following rules:

MALE-<**acronym**>-xx6xxxx

with acronym

for PTS Document : acronym = PTS e.g MALE-PTS-XX6XXXX

for Pre DDP Document: acronym = PREDDP e.g MALE-PREDDP-XX6XXXX

for DDP Document: acronym = FDDP e.g MALE-DDP-XX6XXXX

if Document name contain "PTS" after "MALE" then

- feed the SPN **PTS Reference** = Document Name
- feed The SPN **PTS Issue** = Document revision

if Document name contain "PREDDP" after "MALE" then

- feed the SPN **Pre-DDP Reference** = Document Name
- feed The SPN **Pre-DDP Issue** = Document revision

if Document name contain "FDDP" after "MALE" then

- feed the SPN **DDP Reference** = Document Name
- feed The SPN **DDP Issue** = Document revision

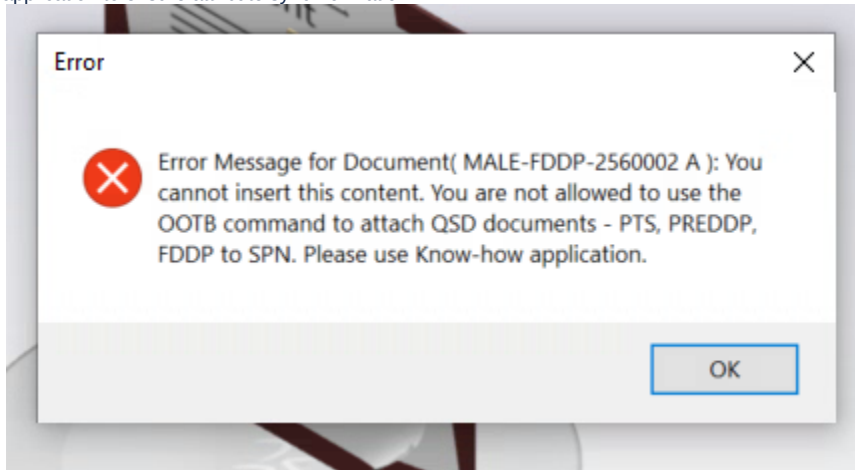

Only non superseded documents can be attached to SPN-(Attached Document should not be in superseded state)

Forbid OoTB function for QSD Document Attachment:

Not able to attach Manually a QSD documents (PTS, PREDDP, DDP)

Only using the Dedicated tool (Know how application) in order to synchronize the dedicated attributes. Nevertheless for all other QSD documents or documents it should remain possible.

If user use the OoTB function in rich client to attach the document Pre DDP, DDP or PTS, an error shall inform him he has to use the Know how application to ensure attribute synchronization

Quality Checks before promoting SPN (Hardware/Software) to Frozen:

1. Check about mandatory attributes per MS# should be as per Boom file

<https://docs.google.com/spreadsheets/d/1J54iPO5VQaJBcPnDfKhKAKg6nLixB1ahJcKwoRYqcsg/edit?gid=1771167851#gid=1771167851>

2. The mandatory documents QSD are attached to the SPN and should be in Released State

For **PTS** for **MS1,MS2,MS3,MS4**

PREDDP for **MS3 & MS4**

DDP for **MS3 & MS4**

Block edition/Modification of SPN (Hardware/Software) reference attribute

Edition/modification of the following SPN attributes should be possible only through the QSD Documents attachment, whatever the SPN reference status is.

- **PTS Reference** = Document Name
- **PTS Issue** = Document revision
- **Pre-DDP Reference** = Document Name
- **Pre-DDP Issue** = Document revision
- **DDP Reference** = Document Name
- **DDP Issue** = Document revision

SPN Data Model and Layout update

Modify SPN Layout during SPN creation and modification (SW)

During SPN creation

- the following attributes shall not be displayed:

- Design Range
- Collaborative Policy
- Business Type
- English Title
- Manufacturable/procurable
- **SAL (hidden at creation)**

- The following attributes shall be displayed in this specific order

Title (SPN)
 Part Number type
 FSCM
 Airbus Part Number
 Management State
 Equipment Supplier
 Equipment Supplier Designation
 Equipment Type
 Equipment DAL Level
 For Ground use Only
 Military
 PTS Ref
 PTS issue
 EDES Ref
 EDES issue
 Pre-DDP ref
 Pre-DDP issue
 DDP ref
 DDP issue

After creation (Equipment SPN tab):

- To have the same layout as the Creation Tab,
- in addition, these attributes shall be Hidden or Added to the specif Tab "Unused Ref Attribute - do not fill"
 - Design Range
 - Collaborative Policy
 - Business Type
 - English Title
 - Manufacturable/procurable
 - SAL (hidden at creation)
